

Planning & Req. Analysis

Date: 29/09/2023

Task: Add fields that are useful for the application.

Goal Product: Design a website for Ohara Jr. College which includes all the fields such as

- a. All information regarding the college
 - **photos**
 - **results**
 - **notification window**
 - **admission form**
 - **login form(Teacher and student)**
 - **alumni network (Phase 2)**
 - **result section - Phase 2**
 - department-wise sections
 - Achievements of students
 - **payment portal - Phase 2**
 - events
 - different groups
 - **Contact Page**
 - **Full Year Holiday Timetable**
 - All faculty information.
 - **Parents Connect - (Can see the academic records for their students) (Will get a lot of slang if we build this) 😄(Phase 3)**

Phase - 2

- b. Student's login section:
 - Profile
 - Records (Academics(Current + Past Year), Attendance, Subjects)
 - Fees need to be paid
 - Scholarship if any
 - Class time table
 - Attendance
- c. Teachers Section:
 - Profile
 - Classes under them – (Portal to fill marks of the exam)
 - Their timetable

- If Class teacher of any class - a portal to fill in the information of students in their class - (Attendance, final marks)
- d. Management Section -
- Section for Incharge (manage class timing and see the data of everyone)
 -
-

Phase 1 Essentials:

1. Layout of the website
2. Will keep photos videos for later - (end of the phase 1)

Frontend -

1. Login for general, login for students, login for teachers
2. Admission form - Beginning
3. Portals for each student and teachers
4. Holiday Time - Table window
5. Faculty Information - Display
6. Achievements of Students
7. photos videos for later - (end of the phase 1)

Backend -

1. Build Mechanism for admission and process of selecting students
 2. Accepted students will get notified by the mail, their login credentials (Phase 2)
 3. Create Database for students, teachers, applied students
-
